EDUCATION

Bachelor in **Information Technology**
with a concentration in Software Development

Georgia Gwinnett College
GPA: **3.92**

Lawrenceville, GA

Graduating December 2017

TECHNICAL SKILLS

Technologies Java, ASP.NET Core MVC, RESTful APIs, SQL, Git, Angular, Node.js, JavaScript, HTML5, CSS3, Bootstrap, Apache Struts, Tomcat, Python, R, Octave, Apache Cordova, Android

Software Visual Studio 2017, Eclipse EE, Azure, Ubuntu and Mint Linux Distro, Astah, Android Studio

Certifications Oracle Database 11g: SQL Fundamentals I, MTA – Networking Fundamentals (MTA – 366)

WORK EXPERIENCE

Nuesoft Technologies, Inc.
Software Development Intern

Marietta, GA

May 2017 – **August 2017**

Developed a “kiosk” patient check-in system for utilization within doctor practices:

- Implemented a responsive user interface utilizing Bootstrap, CSS3, HTML5, jQuery, and JavaScript
- Designed new back-end Java services and SQL queries to communicate to a SQL Server database
- Participated in daily stand-ups with team members and managers
- Successfully deployed the system to production for client feedback
- Worked in a Linux Mint, SQL Server, Eclipse EE, Java 7, Git, and Apache Struts 1.3 environment

ACADEMIC PROJECTS

Greater Gwinnett Reentry Alliance Web Application

August 2017 - **Present**

Developing a web application for the Greater Gwinnett Reentry Alliance non-profit organization to help them better provide services to re-entering citizens from prison:

- Implementing a user authentication system utilizing ASP.NET Core Identity
- Designing and implementing a SQL Server 2016 database utilizing Entity Framework Core
- Managing application deployment on Azure
- Working in an Azure, SQL Server, Visual Studio 2017, ASP.NET Core MVC, C#, Git, environment

Georgia Gwinnett College Intern App

January 2017 - **May 2017**

Developed a web application to centralize the application process for Georgia Gwinnett College's Biology and Information Technology internship programs:

- Implementation of system to handle user document uploads, database export to CSV functionality, and user feedback system
- Design and implementation of a NoSQL database hosted on MongoDB
- Worked in an Agile, Node.js, and NoSQL environment

ACHIEVEMENTS

- 1st place Database Design in the 2017 CompTIA AITP National Collegiate Conference
- President's List
